

# Turny® Evo

A programmable powered swivel and lift base that rotates the car seat and brings it completely outside the vehicle.

The Turny Evo is a seat lift that will allow the user to get seated outside the vehicle, before being comfortably lifted to a safe position inside. Having the car seat completely outside of the vehicle and at a height of choice can be very helpful when getting seated or making the transfer from a wheelchair.

The unique feature of the Turny Evo is its programmable movement path. This allows the Turny Evo to be individually tailored to each user/vehicle combination and enables many driver's side installations.

### Quick facts

- Advanced seat lift
- Programmable movement path provides excellent head space and leg space
- Powered lift and swivel
- Generous lifting height
- Built-in foot rest
- Adjustable comfort position

### Specifications

POWER SUPPLY ..... 12 V
